

**Why DIONICS  
\$40 MOSFET  
Relay is a  
better buy than  
a \$2 relay...**

- 
- 11 million hours MTBF
  - designed to MIL-R-28750, full MIL spec testing available
  - immune to unpredictable loads, up to 10A surge
  - hermetically sealed metal package
- 

Other features include:

- no false turn-on • low-level logic compatibility
- low ON resistance • high-speed switching response
- 6-pin mini-DIP footprint

Built for such demanding applications as:

- automatic test equipment • telecommunications
  - instrumentation • DC motor control
  - REED Relay replacements in problem applications
- 

*Where performance, quality, and reliability cannot be compromised, specify Dionics' Power MOSFET PHOTOVOLTAIC Relays.*
